Notes to Consolidated Financial Statements
March 31, 2010
(Unaudited – See Notice)
(expressed in Canadian dollars)

1. Nature of Operations and Going Concern

The Company was incorporated on February 13, 2002 pursuant to the *Company Act* (British Columbia) and on July 15, 2002 the common shares of the Company were listed for trading on the TSX Venture Exchange (“Exchange”). The Company is in the process of actively exploring its mineral properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The Company is considered to be in the exploration stage and does not have operating cash flow.

The recoverability of amounts shown for mineral property interests in Note 6 is dependent upon one or more of the following:

- the discovery of economically recoverable reserves;
- the ability of the Company to obtain financing to complete development; and
- future profitable production from the properties or proceeds from disposition.

For the three months ended March 31, 2010, the Company reported net loss of \$794,508. The Company has a history of losses and an accumulated deficit of \$13,689,527. Management believes its \$3,459,092 working capital is sufficient to meet administrative, exploration and property obligations for the 2010 year.

In 2008, the Company implemented a cash preservation measure whereby, senior employees and a consultant mutually agreed to defer 10% of their salaries or fees and the independent directors agreed to defer their retainer. These amounts accrued as a debt owing by the Company and did not bear interest. At the Company's election, this debt can be satisfied in cash and/or common shares. The debts arising out of 2008 and 2009 have been paid. Commencing January 1, 2010, 10% of the senior employees' salaries will be deferred under the terms above with repayment to be reviewed later in the year.

These consolidated financial statements have been prepared on a going concern basis in accordance with Canadian generally accepted accounting principles, which assumes the realization of assets and liquidation of liabilities in the normal course of business. The Company's ability to continue as a going concern is dependent on continued financial support from its shareholders and other related parties, the ability of the Company to raise equity financing, and the attainment of profitable operations, external financings and further share issuances to meet the Company's liabilities as they become payable. These consolidated financial statements do not reflect adjustments in the carrying value of the assets and liabilities, the reported expenses, and the balance sheet classifications used, that would be necessary if the Company was unable to realize its assets and settle its liabilities as a going concern in the normal course of operations, and that such adjustment could be material.

2. Significant Accounting Policies

(a) Basis of presentation

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles and the functional currency is the Canadian dollar. These consolidated financial statements include the accounts of the Company and its wholly-owned integrated subsidiary, which has been inactive since its incorporation on December 17, 2003. All material intercompany transactions and balances have been eliminated.

2. Significant Accounting Policies (continued)

(b) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas of estimate include determining the fair value of marketable securities, collectability of receivables, the impairment of assets and rates for amortization, accrued liabilities, future income tax balances and the inputs used in calculating stock-based compensation. While management believes the estimates are reasonable, actual results may differ from those estimates and may impact future results of operations and cash flows.

(c) Cash and cash equivalents

The Company considers cash and cash equivalents to be cash and short-term investments with original maturities of three months or less or redeemable features from the date of acquisition, and readily convertible to known amounts of cash without a significant risk of change in value.

3. Changes in Accounting Policies

New Accounting Pronouncements Not Yet Adopted:

A summary of new Canadian GAAP pronouncements which may affect the financial disclosure and results of operations of the Company for future interim and annual periods.

(a) Business Combinations, Non-controlling Interest and Consolidated Financial Statements

In January 2009, the CICA issued Section 1582 “Business Combinations”, Section 1601, “Consolidated Financial Statements” and Section 1602 “Non-controlling Interests” which replace Section 1581 “Business Combinations” and Section 1600 “Consolidated Financial Statements”. Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combinations accounting standard under IFRS (defined below). Section 1582 is applicable for the Company’s business combinations with acquisitions dates on or after January 1, 2011. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. Section 1601 is applicable for the Company’s interim and annual consolidated financial statements for its fiscal year beginning January 1, 2011. Early adoption of these Sections is permitted and all three Sections must be adopted concurrently. The Company is evaluating these new standards.

(b) International Financial Reporting Standards (“IFRS”)

In February 2008, the Canadian Accounting Standards Board announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010.

4. Marketable Securities

	Cost	Unrealized Loss	Fair Value
Available-for-sale securities at March 31, 2010	\$ 873,232	\$ (221,650)	\$ 651,582

Marketable securities are common shares in other junior exploration companies received via property or option agreements and from the conversion of the Uranium North Resources Corp. (“Uranium North”) loan in 2008.

5. Financial Instruments, Risk Management and Capital Disclosures

(a) Fair value of financial instruments

The Company’s cash and cash equivalents and marketable securities are recognized on the balance sheet at their fair value. The carrying value of receivables, deposits, accounts payable and accrued liabilities, and due to related parties approximates their fair value due to their short-term nature. Marketable securities are carried at their fair value based on quoted market prices on the TSX Venture Exchange, as disclosed in Note 4.

The following table illustrates the classification of the Company’s financial instruments carried at fair value within the fair value hierarchy as at March 31, 2010:

	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 2,893,499	\$ -	\$ -	\$ 2,893,499
Marketable securities	-	651,582	-	651,582
	\$ 2,893,499	\$ 651,582	\$ -	\$ 3,545,081

As it may be difficult to sell the Company’s marketable securities position without impacting the quoted market price and the market may not be considered active, the marketable securities have been classified as Level 2.

(b) Risk management

Credit Risk

The Company is exposed to credit risk with respect to its cash and cash equivalents, and receivables. To minimize this risk, cash and cash equivalents, and cash exploration funds have been placed with major Canadian financial institutions. Receivables include GST which has low risk of default.

Over the last two years, credit risk increases, as service providers may not always be able to perform in accordance with the terms of a contract. To help mitigate this risk with contracts that require large advances, the Company may place funds in-trust with a lawyer.

(Unaudited – See Notice)

5. Financial Instruments, Risk Management and Capital Disclosures (continued)

(b) Risk management (continued)

Equity Market Risk

The Company is exposed to equity price risk arising from its marketable securities, which are classified as available for sale and carried at quoted market prices.

Interest Rate Risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities.

Liquidity Risk

The Company ensures that there is sufficient capital in order to meet annual business requirements, after taking into account administrative, property holding and exploration budgets, against cash and cash equivalent holdings. As the Company does not have operating cash flow, the Company has relied primarily on equity financings to meet its capital requirements.

Over the two years, liquidity risk increases, as other things being equal, the price of an asset will be reduced if the holder cannot sell the asset immediately. Included in marketable securities are large share positions in junior resource companies, which could be difficult to sell in depressed markets.

Foreign Exchange Risk

The Company is not exposed to significant foreign exchange risk as it operates in Canada and makes few US dollar purchases.

(c) Capital management

The Company considers its capital structure to consist of the components of shareholders' equity. Management's objective is to ensure that there is sufficient capital to minimize liquidity risk and to continue as a going concern (see Note 1). As an exploration stage company, the Company is currently unable to self-finance its operations.

The Company's share capital is not subject to any external restriction and the Company did not change its approach to capital management during the period.

6. Mineral Properties (continued)

(a) Amaruk Project, Nunavut

The Amaruk property is near the community of Kugaaruk, Nunavut. Portions of the property have been optioned to other diamond exploration companies as described below. The property is subject to a 2% gross overriding royalty ("GOR") on diamonds and a 2% net smelter royalty ("NSR") on other minerals except gold, payable to BHP Billiton Diamonds Inc.

(b) Ualliq - Amaruk Project, Nunavut

On July 26, 2006, the Company and International Samuel Exploration Corp. ("International Samuel") entered into an agreement covering an area predominantly within the western portion of the Company's Amaruk Project. International Samuel has an option to earn a 30% interest in the Ualliq project by issuing 100,000 common shares (post consolidation of 20 to 1) to the Company (received) and incurring \$3,000,000 in expenditures on the property on or before December 31, 2010 (one year extension granted, previously December 31, 2009). In addition, for each of the first four kimberlite bodies discovered on the property, International Samuel shall issue 250,000 common shares to the Company.

In 2007, the Company and International Samuel entered into an agreement to form a 50/50 partnership on claims that were staked called the Ualliq West property and contiguous with the Amaruk and Ualliq properties. The Company is the project operator.

(c) Sakari - Amaruk Project, Nunavut

On July 31, 2006, the Company and Shear Minerals Ltd. ("Shear") entered into an agreement covering an area within the southwest portion of the Company's Amaruk Project. Shear earned a 50% interest in the Sakari project by making a payment of \$97,000 in refundable deposits and incurring \$185,940 in expenditures on the property before June 30, 2007. The Company is the project operator.

(d) Siku - Amaruk Project, Nunavut

On October 4, 2006, the Company and Arctic Star Diamond Corp. ("Arctic Star") entered into an agreement covering an area within the southwest portion of the Company's Amaruk Project. Arctic Star earned a 50% interest in the Siku project by issuing 1,500,000 shares to the Company, funding approximately \$956,000 in bonds on the claims and incurring \$2,500,000 in expenditures on the property before September 30, 2009. In addition, for each of the first five kimberlite bodies discovered on the property, Arctic Star shall issue 100,000 common shares to the Company. The Company is the project operator.

(e) Tunerq – Amaruk Project, Nunavut

The Company holds a 100% interest in the Tunerq nickel prospect located on the Amaruk property.

On March 8th, 2010, the Company announced that it has signed a Letter of Intent with Minerals and Metals Group ("MMG") whereby MMG may earn 75% of the nickel and other base metals on the Amaruk Property in Nunavut, by spending \$6,000,000 and completing a pre-feasibility study on any nickel or base metal deposit that might be identified on Amaruk.

6. Mineral Properties (continued)

(f) Victoria Island, Nunavut and Northwest Territories

The Company holds a 100% interest in the Blue Ice, Hadley Bay, Wellington and White Ice projects, which are collectively referred to as “Victoria Island”. The projects consist of various claims and leases, which are either adjoined or are within close proximity of each other. Applications to take portions of the property to lease are in progress. Portions of the Victoria Island properties are subject to a 1% GOR and Washburn is subject to a 2% GOR, both on diamonds.

(h) Hepburn, Northwest Territories

The Company holds a 100% interest in the Hepburn project.

(i) Kidme, Northwest Territories

The Company holds a 100% interest in the Kidme project.

(j) Other properties

The Company holds interests in various other properties located in Nunavut and the Northwest Territories.

(i) Thelon, Nunavut and Northwest Territories

As part of the Uranium North arrangement completed in 2006, the Company transferred substantially all of its interest in the property pursuant to a memorandum of understanding dated April 14, 2005, with Pathfinder Resources Ltd. (“Pathfinder”). In August 2006, Pathfinder amalgamated with Bayswater Uranium Corporation. The Company retains the right to a 2% NSR with respect to metals (except for uranium) and a 5% uranium royalty.

(ii) Northern Recon, Nunavut and Northwest Territories

The Company has acquired various exploration permits for grass-roots projects and continues to develop and evaluate these projects. In 2006, some projects were transferred to Uranium North whereby the Company retains varying royalties, which include a 2% GOR with respect to diamonds, a 2% NSR with respect to metals (except for uranium) and a 5% uranium royalty.

8. Share Capital

(a) Authorized

Unlimited common shares without par value.

(b) Income tax effect on flow-through share renouncements

In February 2010, the Company renounced \$462,080 of exploration expenditures under its flow-through share program, resulting in a future tax liability of \$115,520, which is deducted from share capital.

(c) Stock options

Options to purchase common shares have been granted to directors, officers, employees and consultants at exercise prices determined by reference to the market value on the date of the grant.
